Ankarsrum Die Casting AB

Professional High Pressure Die Casting and Post Processing

- ALUMINIUM HPDC
- CNC MACHINING • PRECISION WASHING (residual dirt requirements)
- CLEAN ROOM ASSEMBLY, INSPECTION & PACKING
 - ROBOT GRINDING & POLISHING
 - LEAKAGE TESTING • SURFACE TREATMENT
- LOGISTIC SOLUTIONS INSIDE EUROPE AND GLOBALLY

ISO9001 and ISO/TS16949 certified operation

Cleanliness Requirement

Residual dirt performance is an important request today, which allow new technologies to be introduced with diecasted aluminium. Today Ankarsrum Die Casting AB has a well-developed knowhow, based on long experience and extreme requirements from customers.

Wide value chain

Together with our network of suppliers we can offer an extended value chain. E.g. surface treatment, powder coating, anodizing and sealing impregnation.

Comprehensive & reliable process design

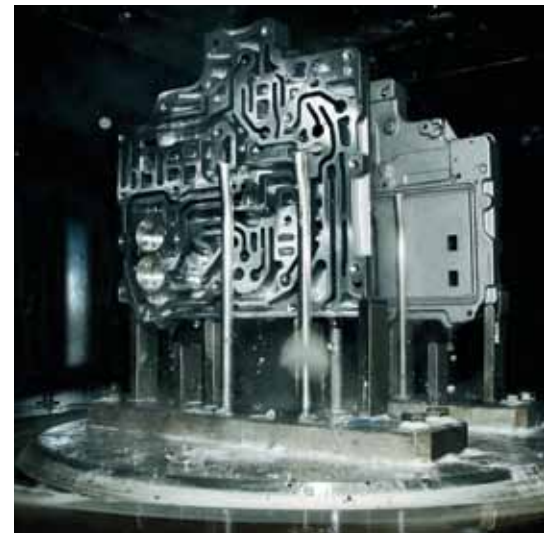

With well-developed production layout and high level of automation, we are able to offer best practises capability out of our processes.

Foundry & Machining

Automated Aluminium HPDC production cells, 400-900 ton clamping force and integrated trimming and blasting operation. Automated CNC-machining cells with robot handling and vision control.

Extreme die & tooling lifetime

Quality of the die/mould is one of the most important part of the production process. Today we have built up our own "tooling concept" and together with our tool supplier and process management, we are able to reach extreme long lifetime.

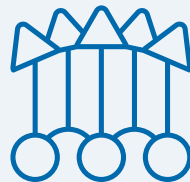

Ankarsrums business concept

is to offer products that give our customers competitive Advantages through a comprehensive concept and cutting-edge competence within high-technology cast goods.

Our customer base is mainly within automotive industry and customers that require a high technical level, functions and logistic solutions.

We supply parts used in e.g. Transmission control units (TCU), air bag housings, advanced electronic cooling system, gear box housing, kitchen machines, electrical motors, professional chainsaws, advanced air field lightning...
